

Fun Activity Report
Vegetable Painting
Class I and II

Name of the activity - Vegetable Painting

Learning objective the activity -

Students will be able to

- use vegetables to create art, enhancing their creative thinking and problem-solving skills.
- develop fine motor skills through handling and manipulating vegetables for painting.
- learn about different textures and patterns created by various vegetables.

Description of the activity - Students engaged in an art activity where they used vegetables as brushes on colorful papers. They dipped the vegetables in paint and created various patterns, shapes, and intricate designs by layering different vegetable prints. The students experimented with different vegetables to achieve unique textures and effects. Some chose to make repetitive patterns, while others crafted detailed images by combining multiple prints. The activity allowed them to explore creativity and understand the potential of unconventional tools in art. Each student produced a unique piece, showcasing their individual artistic expression and experimentation with the medium.

Learning Outcomes:

Students will be able to

- produce unique artworks using vegetables as tools, demonstrating their ability to think outside the box.
- identify and describe the different textures and patterns created by various vegetables.
